Saint James, NY 11780 | 631-873-6739 | [stevens.j.daniel@gmail.com](mailto:stevens.j.daniel@gmail.com) | **WWW:** [dans-89.github.io](https://dans-89.github.io) |  
**WWW:** [github.com/DanS-89](https://github.com/DanS-89)

## Technical Skills

- Programming: Python, Java, Kotlin
- Tools: Git, GitHub, IntelliJ, VS Code, Figma, Microsoft Excel (Advanced), OCR,
- Databases: MySQL, Firestore, Microsoft Azure, MongoDB
- Concepts: Data Structures, Algorithms, OOP, REST APIs, Software Development Lifecycle, AI and Machine Learning, Process Automation

## Experience

### Software Engineer Intern

May 2025 - Current

Curtiss-Wright

Farmingdale, NY

- Developed DoD Label Automation Interface integrating government documentation and internal systems to automatically populate MIL-STD compliant fields, removing manual data entry and reducing processing time from hours to minutes using Python and OCR.
- Built a Documentation & File Checker Automation: scanned Excel and PDF files, validated revision metadata, and processed documents securely on isolated networks using Python and Pandas.
- Created internal SmartSheet automation tools including a document library, facility maintenance system, and training log platform, improving reporting and reducing human error.
- Collaborated with management and end-users to gather requirements, deliver updates, and deploy stable production versions.

### Valuations Analyst

May 2019 - Mar 2021

Gordon Brothers

Farmingville, NY

- Completed industrial inventory appraisals in a timely manner for lending purposes.

## Education

### Bachelor of Science: Computer Science

Dec 2025

SUNY Farmingdale

Farmingdale, NY

- GPA: 3.90/4.00, Presidents List, Epsilon Pi Tau Member (International Technology Honor Society)
- Built functioning applications and projects in Java with documentation on GitHub

### Bachelor of Science: Business Management Finance

2012

Stony Brook University

Stony Brook, NY

## Projects

### No-Bears-CSC325

- Developed stock portfolio app with Java, JavaFX, Firestore, and REST APIs.
- Implemented stock lookup, balance tracking, buy/sell functionality, provided market news and company news.
- Integrated ChatGPT API and Finnhub API to provide financial data and company insights.

## Summary

Computer Science student (GPA 3.9/4.0) with strong experience in Java, Python, and full-stack development. Proven track record of building enterprise-level applications in compliance, finance, and automation using REST APIs, OCR and other modern tools. Background in business finance with professional software engineering experience.

## Honors

- President's List Recipient.

- Epsilon Pi Tau - International Technology Honor Society member.
