Profile

Computer Science Master's student at Stony Brook University with experience building automation and data-driven systems using Python, Java, and distributed data tools.

Technical Skills

- Programming: Python, Java, Kotlin
- Databases: MySQL, DB2, MongoDB, Firestore
- Big Data: Apache Spark, Hadoop
- Tools: Git, GitHub, IntelliJ, VS Code, Figma, Excel (Advanced), OCR
- Concepts: Algorithms, REST APIs, Distributed Systems, Logic Programming, Data Pipelines

Experience

SOFTWARE ENGINEER INTERN | CURTISS-WRIGHT | MAY 2025 – FEBRUARY 2026

- Built document validation automation for Excel/PDF files, validating revision metadata and reduced processing time from 2 hours to 15 minutes (~90% reduction) using Python and Pandas.
- Developed DoD Label Automation Interface integrating government documentation and internal systems to automatically populate MIL-STD compliant fields, removing manual data entry and reducing processing time from hours to minutes using Python and OCR.
- Created internal SmartSheet automation tools including a document library, facility maintenance system, and training log platform, improving reporting and reducing human error.
- Collaborated with management and end-users to gather requirements, deliver updates, and deploy stable production versions.

VALUATIONS ANALYST | GORDON BROTHERS | MAY 2019 – MARCH 2021

- Completed industrial inventory appraisals in a timely manner for lending purposes.

Education

Stony Brook University, Master of Science: Computer Science, Anticipated Graduation May 2027

- Relevant coursework: Databases (DB2, Spark, Hadoop), Programming Languages (Prolog, Logic Programming), Distributed Systems, Data Processing.

SUNY Farmingdale, Bachelor of Science: Computer Science, Graduated December 2025

- GPA: 3.92/4.00, Presidents List, Epsilon Pi Tau Member (International Technology Honor Society).

Stony Brook University, Bachelor of Science: Business Management Finance, Graduated 2012

Projects

Stock Portfolio Application

- Built a full-stack stock-tracking application using Java, JavaFX, Firestore, and REST APIs.
- Implemented real-time stock lookup, portfolio tracking, and buy/sell transaction systems.
- Integrated external APIs (Finnhub, ChatGPT) for market data and company insights.

Computer Science and Coding Educational Platform

- Developed a web-based coding and learning platform enabling users to write, test, and execute code in an interactive environment.
- Implemented personalized themes and interactive features to enhance user experience/engagement.
- Built features including a coding playground, exercises, quizzes, and assessments to support interactive computer science learning.
- Collaborated in a team environment to design and develop scalable front and back-end components.

Honors

- Graduated Farmingdale State College with Latin Honors Summa Cum Laude.
- Epsilon Pi Tau - International Technology Honor Society member.
- President's List Recipient.
